

Subject: glaucoma guidelines proposed amendment
Date: Wednesday, 16 January 2013 3:52:42 PM

Dear Sir,
I agree with the proposed changes.

They will allow patients to choose whether to accept their optometrists' diagnosis of glaucoma, initiation of treatment and monitoring, or be referred for confirmation and initiation of treatment.

If the patient chooses the former, the optometrist can still refer in the future, if treatment goals are not met.

Yours faithfully,
Michael Mangraviti (optometrist)
NSW
