

Dear Michelle,  
Some feedback from the Pods on your Consultation Paper:

Members:

1. noted the consultation paper received from the Optometry Board of Australia
2. considered the request for comments on the questions raised in the consultation paper
3. agreed that, in principle, the objective was appropriate but felt that it was somewhat premature and that there would be an inordinate impact on currently endorsed practitioners.
4. considered that this could also affect the optometry workforce given the impact on overseas trained optometrists wishing to register in Australia.

Cheers
